LEUCO „HardRip“ Gang-Rip Saw Blade Program for hard wood in topline quality

Seite / Page

01/01

Inhalt / Content

With immediate effect, LEUCO offers their customers the high-quality „HardRip“ Gang-Rip Saw Blade Program for dividing cuts in dry hard wood.
When developing the program great importance was attached to the design of the teeth. This guarantees clean true to size ripping of planks and lamella or ledges which can be processed into furniture or glued timber products without any additional subsequent machining. The cutting material which has been configured especially for hard wood adds to the cutting quality and guarantees for longest edgelives possible.

Application

- I Gang-rip saws with one or two shafts
- I Length cutting saws
- I For dividing cuts in dry hard woods

Design

- I Cutting material: HL Board 10
- I Extremely high bending strength and hardness of the teeth
- I Special design, tooth geometry and cooling elements

Advantages

- I High process stability thanks to low risk of sawing untrue
- I Exact and precise cuts need less rework
- I Long edge lives provide for the necessary productivity and economic efficiency
