

LEUCO

**PROFILE MACHINING IN
A SYSTEMATIC WAY:
LEUCO g5-SYSTEM &
LEUCO g7-SYSTEM**

**Circular saw blades
g5- and g7-System**

Clean and almost burr-free cuts,
extremely low noise emission,
higher performance and
economic efficiency

www.leuco.com

→ g7-SYSTEM FOR ALUMINUM PROFILES

For extremely low-noise cuts with low wear in aluminum profiles.

→ Application

- For cross- and miter cut machines
- Also suitable for table saws
- For almost burr-free cuts in aluminum profiles
- Wall thickness max. 5 mm, possibly PVC-profiles with/without reinforcement
- Fixed workpiece clamping required

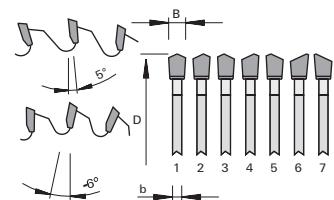

Design

- g7 group tooth geometry
- Cutting material: LEUCO HL Board 06
- Hook angle **positive**: If the saw blade enters the workpiece from behind or below
- Hook angle **negative**: If the saw blade enters the workpiece from above

Superb cutting quality thanks to the g7-System saw blades.

→ Dimensions LEUCO g7-System with hook angle **positive 5°**

→ g5-SYSTEM FOR PLASTIC PROFILES

Allows the highest cutting quality in a great variety of materials and applications.

→ Application

- | For cross- and miter cut machines
- | Also suitable for table saws
- | For cross- and miter cuts for superb cut quality in PVC, solid wood and wooden composites profiles

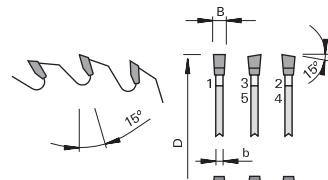

Design

- | G5 group tooth geometry
- | Cutting material: LEUCO HL Board 04+ for plastic profiles

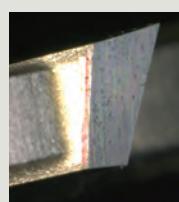

The unique cutting geometry of the „G5“ tooth group geometry, guarantees a precision cut: 4 x ATB, 1 x Flat tooth

PERFECT CUT WITH „G5“ BY LEUCO:

New saw blade tooth

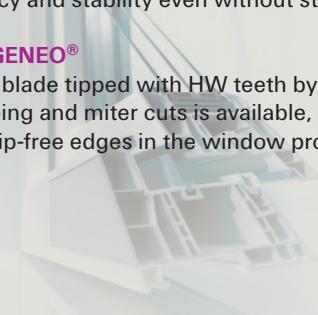

After 250 cuts in GENEO® window profile systems the sawblade tooth shows only marginal wear

For REHAU GENEO® window profile systems

GENEO® by REHAU is a reinforced window profile system made from the high-tech fiber reinforced material RAU-FIPRO®. This means highest energy efficiency and stability even without steel reinforcement.

Tool solution for GENEO®

With the "G5" saw blade tipped with HW teeth by LEUCO a reliable saw blade for clipping and miter cuts is available, offering high cutting quality and chip-free edges in the window profile as well as long edge lives.

THAT'S LEUCO

Innovative, trend-setting and reliable - right from the beginning!

LEUCO is one of the world's largest suppliers of carbide and diamond-tipped machine tools for wood and plastic processing.

For the machining of plastic profiles and aluminum profiles LEUCO offers with the „g5- and g7-System“ the optimal solution.

Processors of PVC and aluminum window profiles can expect a lot from the LEUCO „g5-“ and „g7-System“ saw blades for crosscut and miter cuts: Superb cutting quality and splinter- and burr-free edges on the profiles, extra-long edge life, thin kerfs and low noise.

„LowNoise“ and „Low Vibration“ guarantee a calm and vibration reduced processing
